SANITATION SYSTEMS

PIPES, MANHOLES

ZEBRON® has been used extensively in sewage sanitation facilities throughout the country, especially in Los Angeles, San Diego, Orange County, Houston and other major cities.

In Southern California, hundreds of manholes have been coated with ZEBRON® in the last few years.

In spring/summer of 1982 a major sanitation project in Orange County specified ZEBRON® for both rehabilitation and new construction - including sewer pipes, sedimentation tanks and other concrete structures. Other major sanitation projects have either been completed or are under way in Southern California, Nevada, New Mexico, Texas and the Midwest.

ZEBRON® offers excellent resistance to acids, corrosion, abrasion and temperature variances, and is an ideal coating for all sewage/sanitation applications.

For more information call 1-800-547-4181.
