ZEBRON® Corporation Earns USDA Certified Biobased Product Certification and Label

Newport Beach, CA. (November 03, 2015) — ZEBRON® Corporation has earned the USDA Certified Biobased Product Label for ZEBRON® coatings. The USDA Certified Biobased Product Label verifies that the amount of renewable biobased ingredients meets or exceeds levels set by USDA. Biobased products are finished or intermediate materials composed in whole or in significant part of agricultural, forestry, or marine ingredients.

"This label affords both credibility and visibility to biobased products and their use in the water and wastewater industry," said Roger Decker, President and CEO – ZEBRON® Corporation. "The label helps government agencies, specifying engineers, general contractors and other public works infrastructure stakeholders easily identify and select biobased products and materials, and we look forward to promoting the label in association with ZEBRON® Coatings".

The following ZEBRON® products earned the USDA Certified Biobased Product Label:

- ZEBRON® 385
- ZEBRON® 386
- ZEBRON® 486

All biobased amount claims are verified by independent labs and monitored by the USDA. Consumers may feel secure in the accuracy of the biobased amount and be empowered in making better informed purchasing decisions.

"We are proud that ZEBRON® has earned the USDA Certified Biobased Product Label," said Ron Buckhalt, USDA BioPreferred Program Manager. "Biobased products add value to renewable agriculture commodities, create jobs in rural communities and help our nation decrease its reliance on foreign-sourced and non-renewable petroleum."

The label is estimated to be on certified products and available for consumers by December 15, 2015.
