

SEWER MANHOLE REHABILITATION

In the 1980's, with the help of Southern California Municipalities, Zebron pioneered a form of manhole rehabilitation and lining that has become the system of choice for numerous agencies across the country today. Zebron has rehabilitated thousands of sewer manholes. Our system pairs the finest material with 40 years of application expertise..

Rapid Application:

- Any thickness in one application
- Dry to the touch in 25 minutes
- Live sewer application
- Same day return to service

Exceptional Corrosion Resistance

Zebron resists nearly all acids, bases and salt solutions over a wide range of concentrations. It is also impervious to sea water, raw and oxygenated sewage, bleaches, petroleum, vegetable oils and greases and specialty chemicals as paper mill black liquor.
