

NSF 61 Approved Tank Linings

01 ZEBRON

USDA BIOBASED COATINGS

Zebron #386/9000 and #486/9000 meet the ANSI/NSF Standard 61, Section 5, Barrier Materials testing requirements for use in potable water.

Zebron is spray applied, to any thickness, in a single application, to form a tough yet flexible membrane that is ideal for both concrete and steel substrates.

| Product | For Tanks Greater Than Or Equal To: | Final Cure Prior To Water Immersion |
|-------------|-------------------------------------|-------------------------------------|
| Zebron #386 | 50 gallons | 3 days |
| Zebron #486 | 50 gallons | 3 days |

MADE IN USA

The capability to install Zebron polyurethane on structures of varying sizes and to return those structures to service after only 3 days is a time and cost advantage over other potable water liners.
